Nepean Highway Gardenvale – Custom Circa 1800mm diameter shade making

Customisation

Custom sizes available on request
Contact Sateight to discuss custom size capabilities, we can manufacture soft shades up to 1500mm in diameter.
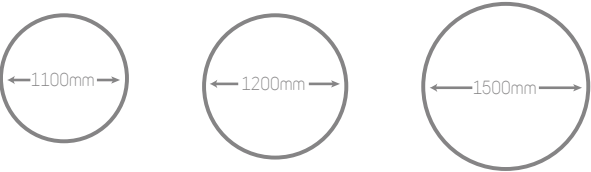

Custom fabrics
Satelight have a standard selection of fabrics that are frequently specified, however we can also use custom fabrics to suit your project requirements.

Complete customisation
As well as customising our standard range, Satelight can provide completely bespoke design and manufacture services of our soft shades. We can combine our soft shades with other materials and processes to create a truly unique outcome.

Contact Satelight to discuss your customisation needs and project requirements.

Discuss with Satelight your project needs

Satelight develop a range of different concepts

Manufacturing of the custom concept

Southbank Grand Apartment Foyer – Custom 3m diameter fabric pendant lights

Roselands Shopping Centre - Custom Pendants with fabric shade and timber blades

Fabric

Have a particluar fabric that you would like to use?

Contact Sateight to discuss fabric customisation options. Satelight work with a range fabric houses a selection of which as shown below. Custom fabrics can be used on our soft shades as long as they pass our testing and quality control approval.

Fabric flat patterns:

The cutting pattern and material meterage is dependant on the shade design and fabric chosen. Below is a comparison of different shade cutting patterns, including a Circa 6003 and a Conic 600 shade.
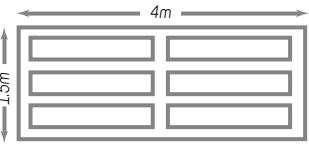

Circa 6003 example
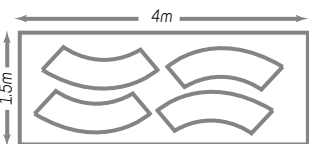

Conic 600 example

Edging

Edging of Shades

Satelight finish the edges of the shades with either a rolled edge, or taped edge with the closest matching tape to the selected fabric.

Taped Edge

Rolled Edge

Colour Temperature

Colour Temperature of Lamps

The colour temperature of LED lamps supplied by Satelight can be either 3000 or 4000k. For a warmer and more ambient light, 3000k lamps are recommended. By emitting a warm light, this can affect the appearance and colour of the fabric on a soft shade. Where as with a cooler light such as 4000k, this has less affect on the appearance of the fabric on a soft shade.

Please note that for soft shades that utilise an ES Lampholder, Satelight does not supply the lamps. Recommended lamps can be seen under each individual fitting.

# Guide to specifying the right shade for your project:
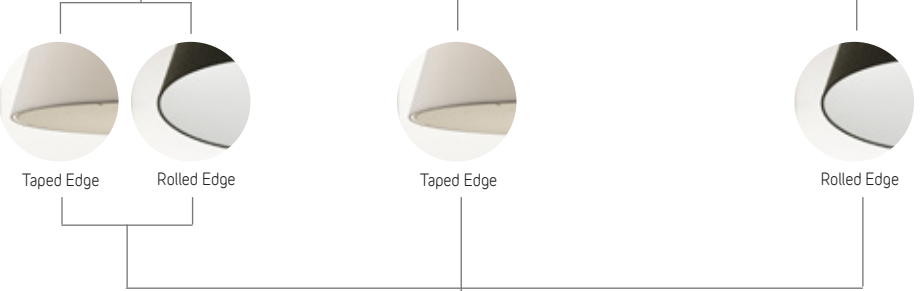

1. Choose your shade design:

Circa   Icarus Drum   Conic

Tiered 2-6003   Tiered 2-1004   Tiered 3-8004   Tiered 5-10009

Bound C   Bound Drum

Icarus TAP   Oval   Oval TAP

Cubic   Rubic   Fractal   Hive

2. Choose your shade material location

Exterior   Exterior and interior

Exterior only

Blanc 104-B   Creme 105-B

3. Choose your shade material

Cotton (CA)   Parchment (PA)   Metallic (M)   Natural (N)   Designer (D)   Linen (L)   Felt (F)   Custom Fabric

Refer to previous pages for standard collection of each material type, contact Satelight for custom material options

4. Choose your preferred edging

Taped Edge   Rolled Edge

Taped Edge

Rolled Edge

5. Specify your colour temperature

* Only applicable for specifying on pendants with an LED Disk.

3000k lamps for a warm effect

4000 k lamps for a true fabric look

Please check the specifications of each pendant as some are supplied with lampholders and others LED disks
