Haiku™ Collection Data and Installation Sheet (Floor Lamp)

Materials Metal, Timber, Plastic, Steel, Paint

Suspension Single ES E27 Lampholder with Electrical Flex and Plug.

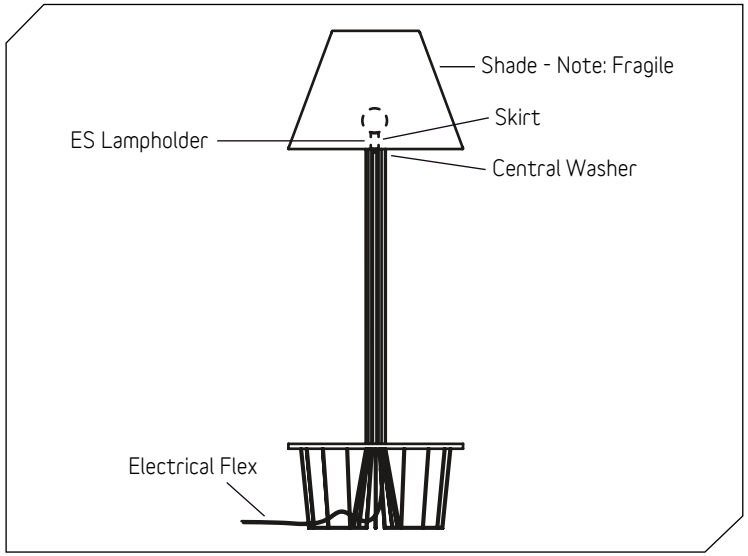
Dimensions 600 Ø x 1665 H (mm)

Lamp Type **240 Volt: Single ES E27 Lamp**

Max. 15 Watt Compact Fluorescent / Max. 42 Watt Eco Halogen / Max. 10 Watt LED.
Check lamp type for suitability with dimming. Please ensure lamps are purchased from quality lamp manufacturers such as Philips or Osram. Low quality lamps may not perform as well.
Lamps not included. Frosted, warm colour temperature, decorative lamps recommended. To change lamps, always switch off power to light fitting, then unscrew lamp from lampholder and replace with same type. Make sure lamps are secured into lampholder prior to light operation.

Installation

1. Be extremely careful when handling the lamp shade as materials are delicate and can scuff easily. Before removing shade from packing box, please check if shade is strapped to the base of the box. Use two hands and only pick up the shade from the central wires, as the walls of the shade are very fragile and will dent easily. Please leave protective plastic cover on shade while preparing for installation.
   DO NOT stack the shades once they are unpacked from their boxes, as the weight of the stack will damage and crush the fragile lampshade walls and always place shade spider DOWN if resting on a surface.
2. Once floor lamp base is in position, undo skirt on lampholder and slide metal washer (centre of the shade) on. Rotate shade to best conceal seamline from general view. Once in place, screw lampholder skirt back on. Do not over-tighten as this may strip the thread on the lampholder.
3. Ensure protective plastic has been removed from both sides of the acrylic diffuser.
4. Do not apply force to shades or fixture and remember to remove protective plastic cover prior to turning on.



Important Safety Instructions

- Lit lamps are extremely hot! Use switch or plug when turning light fitting on or off.
- You must turn off power to fitting and allow lamp to cool down before replacing. Only switch power on once lamp is secured into lampholder.
- Keep fixture away from flammable objects or materials that may burn.
- Remove dust and insects from lamp and surfaces regularly.

Please contact Satelight if you have any questions regarding the steps included in this data sheet. As this luminaire can be customised, installation details may vary from this standard data sheet. Install in conjunction with your delivery docket.

Cleaning
- Do not use abrasive cleaning materials on fixture. Do not wipe fitting surfaces with wet cloth. Dust only.
- Please be aware that the shade materials are delicate and can scuff or mark easily.
