

Symbol[™] Collection

The Symbol[™] collection celebrates the beauty of brass. A part of Satelight's jewellery inspired pieces, the Symbol[™] design pays homage to earrings.

The Symbol[™] Vert pendant is designed to hang sideways, while the Symbol[™] Horizon offers downward illumination. The hand brushed brass dish reflects the light from the light bulb, creating a glorious halo effect. To contrast the front side of the dish, the reverse has been finished in a hand burnished black.

Working with natural materials, the Symbol™ wall light's warm brass is married with a hardwood timber centre.

Symbol[™] Collection
